CAREER OBJECTIVE

Mechanical Engineering student with hands-on experience in CAD modelling, 2D drafting, product design, fabrication, manufacturing processes, and quality inspection through internships, academic projects, and technical activities. Seeking an opportunity to apply my design and engineering skills, gain practical exposure to industrial automation and pneumatic systems, and contribute to the development of reliable engineering solutions.

EDUCATION

B.E.Mechanical Engineering	Kangeyam Institute of Technology, Tirupur	2023-2027	CGPA: 7.57
HSLC (Class XII)	Green Park Matric Higher Secondary School, Erode	2023	67.33%
SSLC (ClassX)	Green Park Matric Higher Secondary School, Erode	2021	All Pass

INTERNSHIP & INDUSTRIAL EXPOSURE

- Coral Engineering Works India Private Limited – 15 Days / Gained hands-on exposure to coil manufacturing, quality inspection, and dimensional accuracy verification.
- PRS Compressors Private Limited – 15 Days / Acquired practical knowledge of compressor assembly, engineering drawings, production processes, and shop-floor operations.
- Industrial Visit at Mettur Thermal Power Plant, Mettur – 1 Day / Observed large-scale industrial equipment, power plant operations, and standard industrial practices.
- Industrial Visit at DMW CNC Solutions, Perundurai – 1 Day / Gained industrial exposure to CNC machining, manufacturing processes, and production workflows.

TECHNICAL SKILLS

- CAD & Design:** AutoCAD, SolidWorks, CATIA V5, Autodesk Fusion
- Manufacturing & Maintenance:** Manufacturing Processes, CNC Basics, Design for Manufacturing (DFM), Dimensional Inspection, Quality Inspection
- AI Tools:** ChatGPT, Claude, Gemini — used for technical research, documentation, and problem-solving support

AFFILIATIONS

- Active Member, **SAE India**

AREA OF INTEREST

- Production Engineering
- Product Design & Development
- CAD Modelling
- Quality Control

PROJECTS

Go-Kart Restoration

- Diagnosed and restored a non-working Go-Kart to full working condition, repairing faults across the chassis, steering, and braking systems
- Performed reassembly, testing, and iterative improvement to ensure safe and reliable operation — 1st Prize, College Science Exhibition

Adsorption Desalination System with Thermally Enhanced Coated Silica Gel Adsorbent — MSME Idea Hackathon 6.0

- Proposed an adsorption desalination system using thermally enhanced coated silica gel to improve heat and mass transfer during the adsorption-desorption cycle.
- Developed the concept to utilize low-grade solar energy or industrial waste heat as the primary thermal source.
- Focused on improving freshwater production and reducing energy consumption compared with conventional desalination methods.

ACHIEVEMENTS & EVENTS

- Won 1st Prize in the College **Science Exhibition for the Go-Kart** troubleshooting and restoration project.
- Participated in CAD Modeling in Kongu Engineering College, Perundurai (22 January 2026)
- Participated in a CAD Modeling event at Kangeyam Institute of Technology on (24 April 2025)
- Attended Work shop on Emerging Trends in 3D Printing Technology at Kongu Engineering College, Perundurai (22 January 2026)
